

**To Whom It May Concern,**

I am pleased to write this letter of recommendation for Alanoud Khalid Alawadh , who has recently completed her training in Continuous Quality Improvement and patient Safety (CQI&PS) Department at Armed Forces Hospital – Jubail as part of her Bachelor of Health Informatics program.

During their training period, Alanoud consistently demonstrated a high level of analytical skill, and dedication. Their role primarily involved collecting, analyzing, and interpreting healthcare data to support our quality improvement initiatives. This included generating key performance indicators (KPI) dashboards, performing statistical analyses, and assisting in the preparation of reports used in departmental Statistics and strategic planning.

One of her key strengths was the ability to apply statistical methods to real-world hospital data, turning complex datasets into meaningful insights. For example, She worked on KPI Analysis Report, which significantly contributed to identifying trends and improving patient care outcomes. Alanoud also displayed a keen understanding of Statistics tools, such as Excel.

Moreover, she was a valued team player, effectively collaborating with clinical and administrative staff, her enthusiasm for learning and commitment to improving healthcare quality through data-driven approaches were evident throughout the training period.

I am confident that Alanoud Khalid Alawadh will be an asset to any organization focused on healthcare data analysis, informatics, or quality improvement. I fully recommend her without reservation for any future opportunity in the field.

Sincerely,

Best regards,  
Atheer Khalid AlQarni
