

Armed Forces Hospital – Jubail  
CIT Administration

مستشفى القوات المسلحة بالجبيل  
إدارة الإتصالات وتقنية المعلومات

**Recommendation Letter**

1 July 2025

It is my pleasure to recommend Ms. Alanoud Khalid Alawadh , I have known Alanoud for over ten months during which time she was in Armed Force Hospital Jubail in communication and Information department - Health Information System (HIS) Section as trainee.

I have consistently been impressed by Alanoud 's positive attitude and high level of productivity during her time at Armed Forces Hospital-Jubail.

Alanoud is a highly capable individual who works with new technologies and proved herself on it, Robotic Process Automation (RPA) was a great example of theses technologies she did great effort and publish 2 projects using this technology.

She is a quick learner with the ability to digest large volumes of information. I have pursued a number of extracurricular activities which have allowed her to deepen their knowledge and skills in the field. She had demonstrated strong IT skills such as writing SQL queries against databases and analyzing HIS system process.

Overall, I believe that Alanoud has the potential to be a highly successful IT professional. I give her my highest recommendation for admission to any institution that requests her services. She will make a positive impact and can prove herself as a great asset.

Abdullatif Fahad Al-Turki

CIT Deputy Director
